

*Advancing the Practical Application of Suspension Technology*

Dear Customer,

Unfortunately, due to the upcoming and recently implemented tariffs, we will be adjusting our pricing on some items effective April 1, 2025. Since tariffs have specifically impacted the costs of our cast steel products and springs, we have no choice but to increase prices on items that use these components. This will directly affect the prices of individual springs, single point H900 suspensions, and H11455 mechanical tri-axle assemblies.

All individual springs will see an increase of 25%. The amount of increase on the single point suspensions and the mechanical tri-axle assemblies will vary based on the percentage of the tariffed products that are used in each assembly. Please contact customer service for the latest pricing.

The pricing for all of our fabricated components, sliders, and 9600/9700 suspensions will remain unchanged. Thank you for your understanding and your continued partnership.

Sincerely,

Collin Parker

Vice President Sales

Hutchens Industries, Inc.
